

Angling in Lake Hop

A visit to Lake Hop is an exciting experience for professional anglers as well as for the whole family. The prices for fishing are very reasonable and the scenic surroundings are beautiful.

The Lake abounds in Arctic Char, Sea Trout and Brown Trout. There is also a good chance of catching a Salmon as thousands need to get through the Lake to their home rivers. Now we're talking fun for a lot less than most all other streams and rivers in iceland. That fact that you just never know what might be on the other end of the line only adds to the fun and excitement of fishing with us on a Hotel Borgarviki arranged adventure by the water.

Fishing-gear can always be rented as well for a very reasonable price. In fact the liscense, the gear, the guide and the time of your life are all available in one package for each person with just a little advance notice from you. Hotel Borgarviki and Lake Hop; partners in a great adventure for all our guests
